

An V. Nguyen

Address: Seoul, South Korea / Bac Ninh, Viet Nam

✉ nguyenan at korea.ac.kr | ✉ nvan.tb2180 at gmail.com | 🏠 <https://nguyen-an13.github.io/>

Research orientations

Deep learning and large foundation models, Natural language processing, Parameter-efficient fine-tuning

Education

Korea University

Dept. of Artificial Intelligence, College of Informatics
Master in Artificial Intelligence

Seoul, South Korea

Sep 2024 - Present

- Research interests: Large foundation models, Parameter-efficient fine-tuning (PEFT), Efficient training
- GPA: 4.5/4.5 -- based on 24 credits
- Graduation project: New paradigms in Parameter-efficient Fine-tuning for Large foundation models

Hanoi University of Science and Technology — HUST

School of Electrical and Electronic Engineering.
Major: Control engineering and Automation (5-year program)

Hanoi, Viet Nam

Sep 2015 - Jan 2020

- GPA: 3.7/4.0 (convertible to 10-scale: 9.25). Ranked: 5th over 299 in the major cohort
- In average, less than 2% of HUST students graduate with CPA of 3.6/4.0 or higher at this time
- Graduation project: Vector control specialised for switched reluctance motors (thesis)
Grade: A+ or 9.9/10. Advisor: Prof. Minh C. Ta

Awards

School of Electrical and Electronic Engineering - HUST

The Excellence Scholarship

2015 - 2017

Each semester top 5% of students with greatest academic performance are awarded.

LG Electronics Development Vietnam (LGEDV)

Software competency certificate

Mar 2024

A internal benchmark of LG corpote involving coding and algorithm skills is designed to hone developer knowledge. This time, there are only 3 developers passing the round of LGEDV.

Korea University

Foreign Natural Sciences and Engineering scholarhsip (Type II)

Fall 2024, 2025

Foreign Global leader scholarship (Type I)

Spring 2025, 2026

Publications

1. **An Nguyen**, Jaesik Choi and Anh Tong, “LoCO: Low-rank Compositional Rotation Fine-tuning,” *International Joint Conferences on Artificial Intelligence (IJCAI)*, **Accepted**, 2026.
2. **An Nguyen**, Anh Tong, “Sparse Structured Matrices: Efficient Adapter Rank in Fine-tuning Foundation Models,” *ICML workshop: Continual Adaptation at Scale*, **Oral Presentation**, 2026.
3. **An Nguyen**, Anh Tong, “SaMA: Morpho Adaptation via Asymmetric Expansion of Kronecker Product,” submitted to *Neural Information Processing Systems*, **Under review**, 2026.

Work and Research Experience

Stochastic Dynamics and Machine Learning Lab — Korea University

Master student —Research assistant

Advisor: Prof. Anh H. Tong

- Large foundation models and Natural language processing
- Parameter-efficient Fine-tuning

Seoul, South Korea

Aug 2024 - now

LG Electronics Development Vietnam

Automotive software engineer on middle-layer applications

Hanoi, Viet Nam

June 2023 - Aug 2024

Vietnam –Korean Institute of Science and Technology

Electrical engineer on Motor drive

Hanoi, Vietnam

Mar 2021 - June 2023

Viettel Aerospace Institute — Viettel Group

Electrical engineer on military warfare systems

Hanoi, Vietnam

Mar 2020 - Mar 2021

Center of Innovation and Technology — CTI Lab — HUST

Undergraduate student

Advisor: Prof. Minh C. Ta

- Electric vehicles and wireless power transfer (WPT)
- Research switched reluctance motors — Graduation project

Hanoi, Vietnam

Mar 2018 - Feb 2020

Research Projects

Structured sparse matrix: Morpho parameterization in fine-tuning large models

2025 - Present

Low-rank compositional rotations in orthogonal fine-tuning large models

2025 - Present

Vector control specialised for switched reluctance motors (EE fields)

2018 - 2020

Small reading application: Quick dictionary lookup as an Edge extension

Personal

Skills

Programming C/C++, C#, Matlab/Simulink, Python/Pytorch

Language Vietnamese: Native

English: 920 TOEIC (May 2020)

IELTS 6.5 Overall (L: 7.0, R: 7.5, S: 5.5, W: 6.0), Mar 2023
